

Navaneeth V

Technical Lead

Professional Summary

- Coding is easy; building systems that others can understand, extend, and scale is the real skill. High-performance apps emerge from strong architecture, disciplined coding and hands-on expertise. I design, build, and scale systems with precision and depth.
- I have a strong understanding of data structures, algorithms, object-oriented principles, design patterns, architectural patterns, relational database design, code debugging, query optimization, core web components, web security, and code version controls.
- I'm proficient at delivering, scaling, and optimizing software products and services. I never compromise on the quality of my code. Using modern technologies, robust design patterns, and SOLID principles, I build software that remains stable and long-live.
- I'm always learning new things because I find them fascinating. Keeping organized and easing people's daily challenges are two things I'm passionate about. My heart is filled with such genuine delight when I help someone else lift their burden; therefore, I constantly strive to do it better.
