Navaneeth V
Technical Lead

Professional Summary

I build high-performance applications by focusing on solid architecture disciplined engineering, and deep hands-on execution. I design, build, and scale systems with precision and depth.

I have a strong understanding of data structures, algorithms, object-oriented principles, design patterns, architectural patterns, relational database design, code debugging, query optimization, core web components, web security, and code version controls.

I'm proficient at delivering, scaling, and optimizing software products and services. I never compromise on the quality of my code. Using modern technologies, robust design patterns, and SOLID principles, I build software that remains stable and long-live.

I'm always learning new things because I find them fascinating. Keeping organized and easing people's daily challenges are two things I'm passionate about. My heart is filled with such genuine delight when I help someone else lift their burden; therefore, I constantly strive to do it better.

Work History
